HARDWARE COMPONENTS OF OS

4. INPUT DEVICES

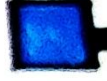

Mouse

Scanner

Microphone

Touchscreen

Barcode Reader

7. SYSTEM BUS

DATA BUS

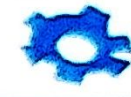

ADDRESS BUS

CONTROL BUS

6. MOTHER BOARD

Main circuit board that connects all components

- Chipset
- BIOS/UEFI
- CMOS Battery
- Expansion Slots
- CPU Socket
- RAM Slots
- SATA Ports

All components work together for smooth operation of OS.

OPERATING SYSTEM

CONCEPT MAP

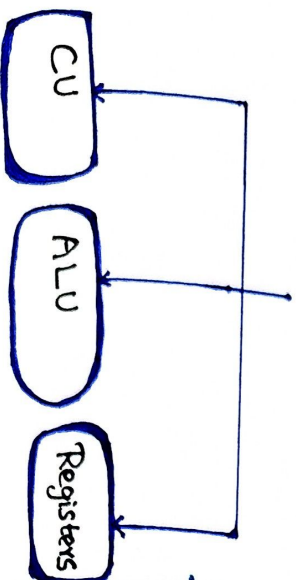

ROLE IN OS

1. CPU (Central Processing Unit)

- Brain of computer
- Performs arithmetic
- Executes instructions of programs
- Contains:

2. MAIN MEMORY

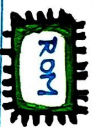

RAM (VOLATILE)

- Temporary Memory
- Stores data / information.

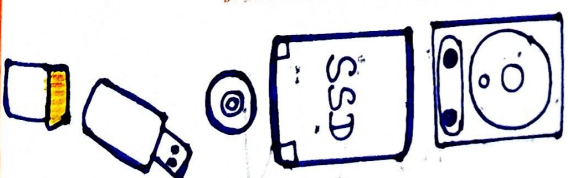

ROM (NON VOLATILE)

- Stores firmware / BIOS
- Retains data even when Power is OFF

3. SECONDARY STORAGE DEVICES

HDD
(Hard disk drive)

SSD
(Solid state drive)

Optical Disc
(CD/DVD)

USB Drive

Memory Card
